Over 110 years of strength and stability

You can have confidence in Midland National®

We focus on what matters most

With 114 years of business under our belt, Midland National's continued and consistent financial strength is a result of our conservative and disciplined investment strategy, our private ownership structure, and doing what's right for our distribution partners and policyowners.

Speaking of policyowners, did you know...

Midland National holds over **1.0 million annuity and life insurance policies**, with assets of over **\$67.2 billion** in 2020.¹

History of strength

As an affiliate of the privately held Sammons® Financial, we are not subject to the short-term earning pressures that publicly held companies often face. As we reflect on over a century of life insurance business, we are proud of our history of making decisions for the long-term and of our continued tradition of financial strength and stability. The high ratings we've maintained from the major rating agencies are testaments to that strength:

“A+”

A.M. BestSM (Superior) (Second category of 15)
S&P Global RatingsSM (Strong) (Fifth category of 22)
Fitch RatingsSM (Stable) (Fifth category of 19)

With a track record like this, you can have confidence in Midland National.

The above ratings apply to Midland National's financial strength and claims paying ability. These ratings do not apply to the safety or performance of the variable accounts, which will fluctuate in value.

Measures of strength - 2020 fact sheet

While we celebrated our 114th year of business in 2020 and are eagerly looking ahead to the future, here is a glance at the success we enjoyed in asset quality for the year 2020.

Strategy #2 Explanation

- ▶ This Fixed Indexed Annuity is for the person that wants the following benefits:
 - ▶ 1. **LIFETIME INCOME (Pension Type Plan)** - Single or Joint. Never outlive your money, and when last person passes, proceeds are sent to your beneficiaries and avoids probate. The company does not keep your money.
 - ▶ 2. **EARNINGS BEFORE INCOME STARTS:** EACH STATEMENT: Minimum Guaranteed Interest = 2% + Plus 150% of earnings added to The Benefit Base. No Losses applied if market declines or crashes.
 - ▶ 3. **INCREASING INCOME:** AFTER INCOME STARTS- Earnings from each statement will be added to your lifetime income amount like a pay raise and can never decrease. This will keep you from outliving your money. Also, this will help keep up with inflation.
 - ▶ 4. **A Plan With No Fees, Charges, or Commissions** - There are none deducted from this plan, for the life of the contract.
 - ▶ 4. **Suggested Use of this Annuity** - A person that does not have a pension or could be concerned that they may outlive their money. Especially if a person is healthy and could live into their 90's or later. Having this annuity would guarantee that they would never outlive their money and would also be able to keep up with inflation with the increasing income feature of this annuity.

Benefits of Indexed Annuities with Annual Reset

For demonstration purposes only. Participation rates can change annually. The chart is based on actual rates for the time period for the S&P 500 only and does not include dividends paid on underlying stocks. Past performance does not guarantee future results. The chart demonstrates historical performance of the S&P 500 between years 1998-2020. The fixed indexed annuity in this hypothetical example uses the annual point-to-point index method based on changes in the S&P 500 to calculate the indexed rate for each term. For purposes of this chart a 50% participation rate is applied for all terms in the period. Assuming \$100,000 initial premium. Indexed interest is credited only on amounts held for the entire term. This example assumes no money is withdrawn from the annuity. Early withdrawal charges will apply if money is withdrawn during the early withdrawal charge period.

Fidelity Investments & Midland National

- ▶ Fidelity Investments and Midland National have teamed up to offer Fixed Indexed Annuities with the expertise of the Fidelity Index Strategy Management, along with other Index Strategies with Black Rock and S&P 500, with a contractual guarantee of never a dollar lost from market declines or crashes.

Important Questions to Consider

- ▶ If things don't work out in your current brokerage account, and you lose your money, from market declines or crashes, do they send you an apology to say we are sorry for the loss of your money?
 - ▶ Does your Brokerage company carry any of the risk of your money? **No, you carry all of the risk as they get their fees and charges even if you lose.**
 - ▶ With where you are today, would it be prudent to transfer your risk to the Annuity Company, or do you choose to maintain it??
- 

Remember the Nature of **Procrastination**

People Don't Plan to Fail
They Fail to Plan
